# Feature Reference Guide

FieldLogix – Your Features

Fleet View	
Data View	Data View Shows the most recent updates for the units in your fleet providing you a snapshot of where your vehicles are right now.
Map View	Map View displays all of your units' correct locations on a map.
Green	
Excessive Fuel	Excessive Fuel report helps companies determine how much fuel is wasted and how much CO_2 is emitted due to poor driving habits such as excessive idling & speeding.
Trends	The Trends Report give the customer a high level view of a vehicle's performance compared to the entire fleet.
Reports	
History	History displays a "breadcrumb" trail of a unit's past path of travel.
Asset Activity	Asset Activity allows you to view a detailed list of updates for your units.
Stop Details	Stop Details allows you to view all stops units have made over any specified time period.
Search Location	Search Location allows you to enter an address and see when units were at that location during any time period.
Notifications	Notifications display any rule violations by any units in the fleet.
Asset Landmark	Asset Landmark displays each time a unit entered and existed any landmark.
Landmark Stops	Landmark Stops displays each time any unit entered and exited a specific landmark.
Start End	Start End allows the user to view the first ignition on and last ignition off for each day.
Job End	Job End displays each unit's first entry into the first landmark and last exit from the last landmark each day.
Mileage	Mileage displays the total miles traveled for all units during a specific time period.
State Mileage	State Mileage displays the total miles traveled for all units within specific states.
Idle Time	Idle Time displays each time a unit idled during a specific time range.
Engine Time	Engine Time is used to monitor each time a unit started and stopped operating and it's total operating hours during a specific time period.
User Activity	User Activity displays all logins and page views by your users.
Dispatch	
Dispatch View	Dispatch View allows you to send locations and messages to your +Nav enabled Garmin navigation devices.
Dispatch Messages	Dispatch Messages allows dispatchers to review messages to and from a specific vehicle over a period of time. It also allows them to communicate with the driver in real-time, providing an interface similar to a chat program.

Maintenance	
Manage Schedules	Manage Schedules allows you to create schedules for an unlimited number of maintenance reminders.
Schedule Summary	Schedule Summary allows you to see the status of all scheduled maintenance reminders that you created.
Settings	
Company Information	Company Information allows you to modify the company's contact information and default map.
